Full Stack Developer @ Support Studio Technologies | June 2025 - Sep 2025

Full Stack Developer @ AgileSoftLabs | Nov 2024 - May 2025

Full Stack Developer @ Redblox Technologies | Oct 2022 - Nov 2024

KEY PROJECTS

Next Street

- **Description:** Nextstreet is designed to implement solutions that connect entrepreneurs and small business owners with the right resources at the right time, from place-based small business strategies to capital transactions.
- **Technologies:** React JS, Nest JS, TypeScript
- **Role:** Developed and integrated the front-end UI for the Next Street project using React and Redux with a Nest.js/TypeScript backend API. Implemented key business logic and maintained the smooth operation of backend services. Ensured code reliability with comprehensive Jest.js unit tests, achieving over 85% coverage, and automated the build, test, and deployment processes via GitHub Actions.

Workspace 360

- **Description:** Workspace 360 is a comprehensive ERP suite that integrates multiple business management functions into a single platform.Functions like Timesheet, Leave Management, Ticketing, Payroll, CRM, Onboarding, etc, into a single platform.
- **Technologies:** Next JS, Node JS, Express JS, TypeScript, Tailwind, Antd
- **Role:** Contributed as a lead role to the development of the front-end UI for various modules, streamlining the codebase by standardizing the folder structure and naming conventions. Also contributed to the back-end by implementing CRUD operations that improved data handling efficiency. Implemented Husky, lint, and prettier configurations, which significantly improved code quality, consistency and format across the project, leading to a reduction in code review time.

Spryntz

- **Description:** Spryntz is a food ordering and dispatch app that connects consumers with local restaurants. It provides a convenient way to order food that is delivered to their doorstep.
- **Technologies:** React Native, React JS, LARAVEL,
- **Role:** Developed and implemented core features, including onboarding, UI cards, order booking, and coupons for both Android and iOS using React Native and React. Contributed to the Laravel-based backend, ensuring its smooth operation

Producer Bazaar

- **Description:** Producer Bazaar is an online marketplace designed for producers to showcase and buy/sell their rights for movies with NFTs, albums, etc..
- **Technologies:** Next JS, Node JS, Express JS, MongoDB
- **Role:** Developed a well-structured interface with smooth navigation, responsive design, and an optimized layout, making it easy for users to browse, discover, and purchase products effortlessly.

TECHNICAL SKILLS

- **Front-End:** React JS, Next JS, React Native, HTML, CSS, JavaScript, Redux, jQuery, Bootstrap, Tailwind, Antd, MUI
- **Back-End:** Node JS, Express JS, Nest JS, TypeScript, LARAVEL
- **Databases:** MongoDB, Postgres, MySQL,
- **Tools & Collaboration:** VS Code, Git, GitHub, Gitlab, Jira, Postman, Figma, FileZilla

CERTIFICATES

- MERN Stack Development - Guvi (2024)
- Soft Skill Development - TCS ION (2024)
- Web Designing - Nextgen Solutions (2022)
- Crash Course on Python - Coursera by Google (2023)

EDUCATION

Bachelor of Science (Mathematics) - 2019

St. Joseph's College of Arts and Science, Cuddalore.

PROFESSIONAL ATTRIBUTES

- Leadership and Collaborative
- Creativity and Smart Worker
- Calmness and Adjustability
